

**INDEX DES BIOAGRESSEURS**

Acyrtosiphon pisum	13
Alternaria Brassicola	157
Aphanomyces euteiches	65, 115
Aphis gossypii	17
Arabidopsis thaliana	157
Botrytis cinerea	157
CABYV	213
Eupoecilia ambiguella	9
Colletotrichum gloeosporioides	139
Colletotrichum musae	135
Diaporthe helianthi	57
Ditylenchus dipsaci	29
Erwinia amylovora	163
Erwinia carotovora var atroseptica	177, 183, 189
Erwinia carotovora var carotovora	183, 41
Erwinia Chrysanthemi	183
Erysiphe cichoracearum	153
Eupoecilia ambiguella	9
Fusarium culmorum	69
Fusarium graminearum	69
Fusarium oxysporum f.sp. melonis	119
Globodera pallida	41
Globodera rostochiensis	37
Golovinomyces cichoracearum	153
Heterodera avenae	23
Heterodera schachtii	33
Leptosphaeria maculans	105
LMV	209
Lobesia botrana	5, 9
Meloidogyne spp.	45, 49
Mycosphaerella fijiensis	131
Mycosphaerella musicola	131
Mycosphaerella pinodes	123
Phoma medicaginis var pinodella	123
Phytophthora cambivora	127
Phytophthora cinnamomi	127
Phytophthora infestans	73, 79, 143, 149
Plasmodiophora brassicae	111
Plasmopara halstedii	101
Podosphaera xanthii	153
PVA - PVX - PVY	199
PVY	203
Ralstonia solanacearum	193
Sclerotinia sclerotiorum	61
Sphaerotheca fuliginea	153
Streptomyces europaeiscabiei	167, 171

## Méthodes d'appréciation du comportement variétal vis-à-vis des bioagresseurs

Streptomyces reticuliscabiei	167
Streptomyces scabies	167, 171
Streptomyces stelliscabiei	167, 171
Tapesia acuformis	83
Tapesia yalundae	83
Venturia inaequalis	89, 95
